Use bangle sizer to measure wrist size

Print this page and verify that the printed ruler scale matches a ruler.

Place your bangle over the scale on the page, line up the inner diameter against the printed measurements in millimeters.

Determine the inner diameter of your bangle in millimeters (mm) using the printed ruler.

Use a bangle size chart to find the corresponding size based on the measured inner diameter.

For example, if the inner diameter measures 60.0mm, the bangle size would be 2-6 anna.
